Lets Go Dancing!!!

Von Baird Zeller

8/2/1947—1/10/2019

Von Baird Zeller was born on August 2, 1947 to Clarence and Bessie Zeller in Powell, Wyoming.

Von attended Lovell Schools and graduated from Lovell High School in 1965. He spent his high school years working in the bee business and on the family farm with his dad. He attended college at Northwest, where he studied horticulture. Von went to Naval school in Pensacola, Florida and served on the Guam Naval base and then in Misawa Japan. In 1976 Von was honorably discharged from the Navy and returned to Lovell to work with his dad in the family bee business that he cherished. Von loved anything with agriculture, felt that beekeeping was an enjoyable business that allowed him to be outside.

Von was a great example of work ethic for his kids, their friends, nieces, nephews, and grandchildren. He took his children to the bees with him before they were old enough to go to school and also had them working on the family farm. He was patient and thought it was important to teach everyday life skills and worked right alongside to make this happen. He wanted everyone to understand and get to feel the satisfaction of a job well done.

Von was excited when his kids and grandkids participated in 4H and FFA. He was a big supporter of the Junior Livestock Sale at the County Fair. Von would come early for the sale and enjoy his “birthday” dinner. His kids always let him know when the sale sheet came out and had a copy ready for the event. He would be there for the first animal to be auctioned and stayed for the last. Von was avid about ensuring participants received recognition through his generous donations. Von spent a lot of time helping his grandchildren with their fair projects especially when it came to pigs. He always tried to talk his grandchildren into training their pigs using a hot shot and electric fence. Attending the fair was the highlight of his summer. Von attended every event his grandchildren participated in starting with the Dog Show the week before and ending with the sale on Friday night.

Von also was a willing volunteer for Agriculture day. He was passionate about the bees and honey business and enjoyed sharing this passion by teaching students.

Judy Preator

8/16/1952—11/28/2019

Judy Preator was born Aug. 16, 1952, to James and Amy Waltman in Chadron, Nebraska. She grew up spending time outdoors with her two older brothers, Dick and Steve, and riding horses with her cousin Val.

She graduated from Assumption High School and continued her education in Alliance, Nebraska, graduating as a licensed practical nurse.

She met the love of her life, David Lee Preator, while doing farm work in Burlington. Dave and Judy were married Dec. 21, 1973. They raised five children in the Big Horn Basin. Judy loved her children and animals. She blended the two passions as a 4-H leader for over 40 years. After Dave passed in 2015, Judy continued her passion of serving others by training her dogs Pepper and Rusty to be service dogs. She volunteered with the dogs at Powell Valley Care Center and reading with dogs at the library.

Judy enjoyed Yellowstone National Park and traveling in Alaska and Ireland. She dreamed of returning. Her other hobbies included knitting, sewing, quilting, genealogy and writing stories.

Judy passed away on Nov. 28, 2019, surrounded by family at the Billings Clinic. She was preceded in death by her husband Dave and her parents Amy (Doug) Franklin and James Waltman. She is survived by her brothers, Dick and Steve, of Nebraska; sons, Aaron (Sabrina) of Durango, Colorado, Brad (Sian) of La Grande, Oregon, and Ryan (Cortney) of Powell; daughters, Chandra of Nome, Alaska, and Lacey of Cody; and seven grandchildren. Funeral services will be held on Friday, Dec. 6, at 11 am at the New Life Church in Powell.

ElRay Bridges

9/23/1939— 3/22/2019

ElRay Bridges was born to Octave Lynn and Melba LaRue Green Bridges on September 23, 1939 in Murray, Utah. He was the first of three children and was raised with many aunts, uncles and cousins.

Dad was a member of FFA during his high school years in Riverton, Utah and took animals to the Salt Lake County Fair every year. During his years at Riverton Jr. High School, he met the love of his life, Ann Butterfield. They graduated from Jordan High School in the spring of 1957 and married in September.

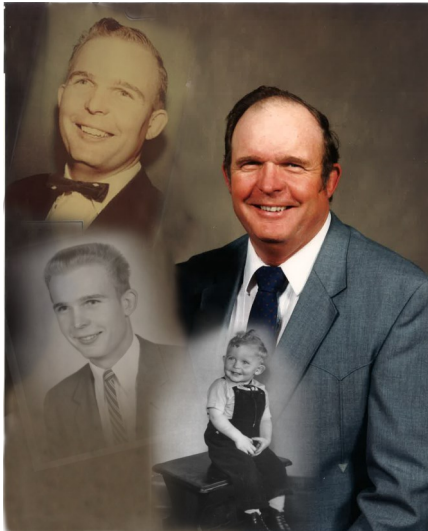

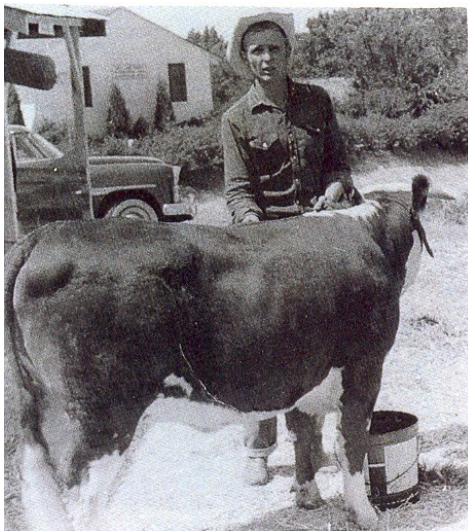

He attended FFA activities at Deaver High School and was awarded an honorary Chapter Degree in 1978 with the Deaver High School FFA chapter. He assisted his two sons with their registered Columbian Sheep projects for 10 years.

He attended banquets and auctions held for the Rocky Mountain High School FFA. He was awarded another honorary Chapter Degree with the Rocky Mountain FFA chapter in the 1999.

He was a 4-H leader for 8 years in Utah and 6 years in Wyoming. He served on the 4-H Council in Wyoming for several years. He provided shelters for 4-H animal projects and assisted several 4-H members in clipping and preparing animals for the fair.

Every year he attended the 4-H and FFA judging competitions and Sales at the Big Horn and Park County fairs. He has helped with the Jr Livestock Sale committee at Big Horn County Fair,

Throughout his life, he was involved with agriculture. The last 15 years before retirement was "the best of the best" for dad as he was employed at the UW Research and Extension Farm in Powell. His knowledge of plants and animals were extraordinary.

Failure to do so will result in the loss of premium money and the exhibitor will be barred from showing at the next year's fair.

Each livestock superintendent will endeavor to have all exhibitors present and urge them to lend assistance by having their exhibits prepared for judging.

No Superintendent or clerk will endeavor or offer to influence the judges in the selection of the winners.

AT THE CLOSE OF THE FAIR, EACH SUPERINTENDENT WILL SUPERVISE RELEASE OF THE EXHIBITS AND MAKE SURE THAT NO EXHIBITS ARE TAKEN HOME UNTIL THE DESIGNATED HOUR SET BY MANAGEMENT.

Within ten days after the Fair, each superintendent is requested to submit to the Fair office suggested changes in his/her department for the next year.

Superintendents and clerks should make sure that no one is allowed in their department during judging time.

JUDGES

All superintendents and judges will need to report to the Fair Office 30 minutes before scheduled judging. All judges are responsible for acquiring and signing a payment voucher at time of check-in.

JUDGES ARE NOT TO AWARD PRIZES TO ANY UNWORTHY EXHIBITS. It is the intention of the management that no premiums are offered to any animal or article which is not deserving. These rules will be strictly adhered to, whether there is competition or not.

Judges will report to the superintendent any exhibitor or exhibitors who, in any way, whether in person or by agent, **INTERFERE WITH THEM DURING THEIR WORK, OR SHOW ANY DISRESPECT TO THEM.** The superintendent will at his/her discretion demand the exhibitor withdraw from the competition if guilty of such acts.

NOTE: Judges are instructed to award, in each instance, only prizes of such grade as the merits of the individual animal or article fully justifies. Absence of competition will not be accepted as justification for awarding a high class prize to an animal or article of medium or inferior quality.

Judges must avoid contact with exhibitors and will refuse to hear merits or demerits of exhibits. They must, if an attempt is made by an exhibitor to interfere or influence their decision, report the fact at once to the Superintendent of that department.

When articles or animals are not deemed worthy, they will not be awarded a premium, whether there is competition or not in the same class.

SECURITY

Police protection and night watchman services will be provided by the Big Horn County Sheriff's Department, but provides no responsibility for loss or damage. The Fair Board claims no responsibility for **LOSS, DAMAGE OR INJURY TO LIVESTOCK, OR PERSON, OR OTHER PROPERTY** belonging to any individual while said property is being exhibited or used in connection with the Big Horn County Fair.

GENERAL INFORMATION

The Big Horn County Fair will not be held responsible for the loss of any article, bird, rabbit, or animal (exhibited at the fair) either during the progress of the Fair, or while it is in route to or from the Fair. Nor will it be held responsible for the safe return of any exhibit to its' owner, although due care and caution will be exercised to prevent all loss and damage.

The management will consider it a great favor if the visitors will report any mistreatment or extortion practiced by an employee of the Fair or Concessionaires. **DO NOT WAIT UNTIL THE FAIR IS OVER TO FILE A COMPLAINT. DO IT IMMEDIATELY!** Correspondence on all matters in relation to the Fair is solicited, and its officers will promptly furnish information desired.

~Hints on Vegetable Exhibiting~

ASPARAGUS - Large size is desirable as it denotes quick growth and high quality. The stalks should be all the same length, green with closed heads of the same diameter at the butt and tapered uniformly.

BEETS - Color and tenderness are desirable qualities in beets. Over-size should be avoided. As a rule, beets from 2 to 2 1/2 inches in diameter are best. Beets showing white streaks should be avoided. They should be smooth without side roots or cracks. If topped, be sure that 1 inch of leaf stalk is left on.

BEANS, GREEN - Snap beans should be under rather than over mature. Long, straight specimens the same length and color should be selected. Avoid stringiness. The pods should be free from rust spots, dirt, and insect blemishes. The ends of the beans should not be broken off when picking. The seed in the pod should appear to be 1/4 to 1/2 grown.

BROCCOLI - Cut stems before the first whorl of leaves. The length of the stem should not be over 5 inches. Heads should be compact, dark green (avoid yellowing) and free from decay, worms or damage caused by wilting or injury.

BRUSSEL SPROUTS - Firmness and medium sizes are important. Avoid all soft and leafy specimens. Color should be uniform. Do not wash. Clean off and remove dead or diseased spots.

CABBAGE - Type is very important. Leaves should not be peeled to closely. The heads should be firm, heavy in proportion to size, not withered or soft, free from damage, freezing or disease injury and the mid-ribs should not be large as that would indicate coarseness. Stems should be cut off.

CARROTS - Avoid over size. Type is important. Quality is best in medium sized specimens. Color is very important. A deep orange carrot as nearly coreless as possible shows to good advantage. Greenish or pale yellow specimens, irregular and coarse specimens should be avoided. Carrots should appear fresh, crisp, firm, smooth, clean, and free from sunburn, side roots, cracks or other damage.

CAULIFLOWER - The heads should be pure white, solid, uniform, smooth, and close-flowered. The heads should not show leaves appearing through the head. There should be no over mature or ricey specimens. The leaves should be trimmed about 2 inches above the center of the head. Cut stems allowing 5 to 6 leaves to remain. Leaves should be free from damage and discoloration. Avoid exposing head to strong light.

CELERY - Should be exhibited with root removed and the outside leaves removed until the inside is uniform in color. Avoid split, pithy, woody, and stringy stalks. Avoid disease infected leaves. Celery should be washed carefully and all dirt removed. Avoid cutting the roots too closely.

CUCUMBERS FOR PICKLES - Avoid oversized and extremes of immaturity and over ripeness. Immature specimens are too spinney. Over ripe ones may turn white or yellow. Cucumbers should run from 2 to 4 inches in size and should be washed. Type and color are very important. Do not mix types.

CUCUMBERS FOR SLICING - Straight, firm, crisp, and fresh. Color should be green and white, not yellow. Avoid mature seed. A small seed cavity is desirable. Cucumbers may be washed.

EGG PLANT - Select specimens that are smooth, firm, free from bronzing and greenness, and free from damage of any kind. Egg plants should be full grown but not too large; they may be wiped, but not washed.

KOHLRABI - Remove root just below ball. Leave 4 to 6 upper leaves trimmed. Kohlrabi should not be hard, woody, pithy; it should be from 3 to 4 inches in diameter. The skin should be easily penetrated by thumbnail. Clean but do not wash.

MUSKMELONS AND CANTALoupES - Must be fully ripe when exhibited and free of soft spots or discoloration. Pick on "full slip". If several days elapse between picking date and exhibit, may be picked on "half slip" and permitted to ripen, stems attached.

ONIONS - Must be thoroughly ripened with necks dry. Uniformity and maturity are of particular importance. Type is important. Avoid large sizes. Should be clean, smooth and not peeled so as

to be slick. The loose wrapper skins should be removed. Onions must be solid and there must be no splits or doubles. Neck should be small. Onions should be free from damage caused by dirt, moisture, sunburn, cut, disease, insects, or other injury.

PARSNIPS - Should be small in diameter and of great length. Free from rust and side roots. Parsnips should be a light creamy color, not corky, top 1 inch above crown.

PEAS - Must be green, fresh and well filled pods. Avoid large empty pods, hard berries and discoloration.

PEPPERS - True to variety, deep in color, fresh, firm and symmetrical. Sweet peppers should show no red color. Pimentos should be red. All peppers should be free from sunscald or injury caused by insects and disease.

PUMPKIN FOR PIE - Uniformity with variety type, size, and color (check with seed catalog for description of your variety.) Free from insect and mechanical injury. Mature as shown by hardness of shell. Stems should be attached. Do not wash.

RADISHES - Crisp and tender; medium to large; uniform shape and color. Free from injury caused by disease, insects, growth cracks, or damage while digging or handling. Clean and wash. Exhibit with foliage; avoid pithy specimens.

SQUASH (SUMMER) - Stems must be left on. Pick when small, before maturity when the shell is extremely soft. Uniform in size, shape, and color. Be sure samples are free from any damaging or blemishes. May be washed.

SQUASH (WINTER) - Select mature specimens with shells hardened. Do not wash. Leave stem attached. Uniform size, shape, and color, free from damage. Extreme size is to no advantage.

SWEET CORN - A good ear of corn is one that has a cob well filled with bright, plump, milky kernels that are just firm enough to offer slight resistance to pressure. (Check via the thumbnail.) The ear should be well filled out to the tip. The exhibitor may remove the outer husks before bringing to the fair. When so placed, the ears should be free from husks and silk, and the shank trimmed to 1/4 inch. The tip of the ear may be neatly clipped, although only a portion of the cob should be removed - not over 1/2 inch.

TOMATOES - Use only perfect shaped specimens true to type, smooth, free from cracks, sunscald, or any blemishes. Should be well colored (no green stalks) ripe, but not too ripe. Must be solid. Display with blossom end up. Remove stems.

TURNIPS - Medium sizes are generally desired as having higher quality. Large sizes may be bitter, corky, and pithy. All samples should look alike. Should be clean and bright in color, but not washed. Remove tops 1 inch from crown. Should be free of damage caused by freezing, pithiness, secondary rootlets.

WATERMELON - Select large, well formed specimens of the true variety; mature, but not over ripe. Free from blemishes or injury such as sunburn, insects or disease. Wipe off, but do not wash. Leave short stems on the melons.

DEPARTMENT E - OPEN CLASS FLORICULTURE

Superintendent: Pat Sheppard

PREPARING YOUR FLOWERS FOR EXHIBIT *Exhibitors are allowed two (2) entries in each class.****

If a flower is to remain fresh throughout the exhibit period, it should be cut no later than the day before it is to be shown. It is generally recognized that cutting in the afternoon (especially late afternoon-when the greatest amount of sugar has ascended into the leaves and blooms), as well as a "hardening off" process will help insure a winning entry. Some flowers, such as Dahlias and Poppies, need to have their stems seared over an open flame immediately after cutting. To encourage the uptake of water in woody-stemmed perennials, such as Hollyhocks and Clematis, cut ends of the stems or stalks should be lightly crushed. Always select flowers that are coming into full bloom-not flowers that are already mature. Flower stems should be cut cleanly at an angle with a sharp knife or pruning shears and plunged into deep, hot water: 110 Fahrenheit is ideal. It is a good practice to carry the bucket of hot water to the garden and place each cut specimen in the water at once. Following cutting and hot water treatment, specimens should be placed in a cool, darkened room. After several hours, when the water has come to room temperature, add ice to the water and leave the flower material undisturbed overnight. Flowers prepared in this way improve their substance and will hold their freshness longer.

Definitions for Cut Flowers, Roses, Dahlias, & Gladiolus:

Bloom: One individual flower, generally on a single stalk

Spike: Several flowers on a long stem. (Example: Gladiolus)

Ribbon point values:

Blue—5 points

Red—3 points

White—1 point

SPECIAL ROSETTES:

Outstanding Flower Arrangement

Outstanding Potted Plant

Premier Exhibitor

DEPARTMENT E - OPEN CLASS DIVISION 1 - CUT FLOWERS
